

INFORMATION PAPER

ATSM-CES  
9 April 1992

SUBJECT: "Wolfmobile"

1. CONCLUSION: The Wolfmobiles concept was developed by CW4 Wesley C. Wolf, which provided food service support to soldiers deployed in support of Operation Desert Shield/Storm (ODS).

2. DISCUSSION:

- CW4 Wolf was the Theater Food Advisor. Early on in the deployment phase of ODS, he recognized the need to provide soldiers in forwardly deployed positions a touch of home, thus the "Wolfmobile" was born. The Wolfmobiles were fully funded and procured by the Kingdom of Saudi Arabia, as well as, all the food and beverages served from them.

- A total of 120 Wolfmobiles were provided to the theater, as well as, five Super Wolfmobiles.

- Each Wolfmobile was mounted on a trailer chassis and fully equipped with all necessary cooking and refrigeration equipment, and used its own power generator.

- VII Corps/XVIII Airborne Corps used the majority of the Wolfmobiles to provide soldiers with a wide range of fast food items (e.g., Hamburgers/Cheeseburgers, Hot Dogs, French Fries, Tacos, Potato Chips, Fresh Fruit, Cold Sodas, etc.).

- Wolfmobiles were also used to support established convoy rest halts between the forward and rear area's.

- Super Wolfmobiles were mounted on a 40 Ft. house trailer frame and could at full production serve approximately 650 soldiers an hour.

- Wolfmobiles were mounted on a 20 Ft. trailer frame and could feed approximately 350 soldiers an hour.

- VII Corps had the most forwardly deployed Wolfmobile operated by the 3d Armored Division in Iraq.

- The Wolfmobile on display here at USAQMC&S was used by the 1st Cavalry Division in Saudi Arabia.

- VII Corps served over 1 million Wolfburgers during ODS.

3. RECOMMENDATION: Submit a work order to Training Aids Branch. Have them build a display board, which can be used for exhibition of newspaper and publication articles on the "Success of the Wolfmobile" (CW4 Wolf can/will provide articles).
